

## Experience

### **New Relic**

Lead Product Designer

May 2025 - Present

Leading design strategy for all platform mapping, including Service, Infrastructure, and Dynamic Flow. Aligning engineering and product to improve enterprise troubleshooting workflows while maintaining the Maps Design Library.

### **Automattic**

Senior Product Designer

2021 - 2024

Designed core features for the open source WordPress visual editor (Gutenberg) impacting 43% of the web. Led developer-focused initiatives at WordPress.com and maintained the division's design system/UI library.

### **NTT Data**

Senior Product Designer

2018 - 2021

Led end-to-end design for Retail, Automotive, and Finance clients, overseeing the journey from initial research and service design to high-fidelity MVPs.

### **Populate**

Designer

2017 - 2018

Led design for ICIJ (International Consortium of Investigative Journalists) and Barcelona City Council on transparency projects. Worked on the UI/UX for Gobierto, an open-government platform.

### **CARTO**

Front-end developer

2014 - 2017

Built the front-end and APIs for the geospatial analysis platform as one of the first developers. Created custom data visualizations and prototypes for enterprise clients.

### **Vizzuality**

Front-end developer

2011 - 2014

Developed UIs for NASA (NEEMO), Google.org (Endangered Languages), Global Forest Watch, and several citizen science projects for the Citizen Science Alliance. Focused on complex data visualization and experimental web interfaces.

## Teaching

### **IED Madrid**

Teacher

2016 – 2019

Taught 3 semesters of Creative Coding using Processing and P5.js to design students.

## Skills

Front-end development · Creative coding · Data visualization · Interactive prototyping · Visual design · Interaction and service design · Qualitative research and usability testing · Design systems · Illustration
